

SUDAN ENGINEERING SOCIETY JOURNAL

January 1999

Volume : 46

Number : 37

ISSN : 0049 - 2469

Papers

The Organization Structure Of A Construction Project

Mohamed Yagoub Ishage Shaddad 1

Outlooks for Hydropower Development in the Republic of the Sudan

Mohammed El Amin El Nour, Valentin Novozhenin 9

Predicting The Effect Of Sediment Withdrawal From Alluvial Channels

M.A Matin , A.M Negm , and A.A Alhamid 14

Experimental Verification of the Analytical Close-Range Photogrammetric System

Elshami Mohammed Masaad 22

Propagation Delay on Satellites Radio Frequency Signals

Kamal Abdellatif Abdalla 31

The Liquefaction Potential Of Central Khartoum

Yahia E-A Mohamedzein , Ahmed M. Elsharief , Mahmoud Abdel Gabbar 43

Study Of Seepage Into Foundation Of A Wheel-Lathe Machine : A Case History

Mohammed Ahmed Osman, Wagdi Ata El Mannan Ali 63

Side Face Cracks In Large Beams : A Fracure Mechanics Approach

Abu Bakr Abdel Wahab , Mutaz Mahdi El Fahal 71

تدقيق طريقة تحديد البارامترات النهائية للهواء المبرد في أجهزة التبريد التبخيري غير المباشر

علمي , يحيى , عيسى

Aims And Scopes

The Sudan Engineering Society Journal aims to serve scholars, researchers and practicing engineers in universities, research institutions and industry in all fields of engineering. The Journal will provide a medium for the communication of information concerning new emerging solutions and trends in engineering research and practice. The Journal will provide a forum for discussion and exchange of ideas and information about research and development in the advances of engineering fields. The journal will accept, after peer review, original research papers, state-of-the-art review papers, completed large engineering project documentations, short communications and discussion of published papers.

The scope of the journal includes, but not limited to, the following engineering fields: Agricultural, Chemical, Civil, Electrical, Mechanical, Mining, Petroleum and all specialized branches within the above mentioned major engineering fields. Papers investigation the areas of computer-aided analysis and design of engineering artifacts and innovative compositional and numerical strategies for solving engineering problems are highly encouraged.

The journal will publish special issues from time to time. These special issues of the journal will contain papers that address emerging themes in the various engineering fields.

NOTES FOR CONTRIBUTORS

1. Submission of Manuscripts

Manuscripts on topics within the scope of the journal should be submitted to the editor, Dr. Kamal Abdelatif Abdalla, Department of Surveying Engineering, Faculty of Engineering and Architecture, University of Khartoum. If desired, submissions may be made to that member of the editorial board who, in the opinion of the paper's author, is most closely related to the subject matter of the paper. The language of the Journal is Arabic and English. Four Copies of the manuscript are to be submitted to the editor-in-chief for review. Material is not normally returned to author(s) even if rejected.

2. Style of Manuscripts

The manuscript should be typed double-spaced on one side only of a good quality white paper size A4. A margin of 25 mm should be left around the page. Pages should be numbered consecutively. The first page should contain the following: manuscript title; author(s) names(s) and affiliation(s); mailing address for correspondence; abstract not exceeding 150 words; The body of the manuscript should follow starting at a new page. The maximum size of the manuscript, including figures and tables, should not exceed 15 pages.

3. Mathematical Expressions

Mathematical symbols and formulas must be typed. Standard symbols should be used whenever possible. All non-standard abbreviations and symbols should be defined when first mentioned. Subscript and superscript must be readily apparent. Equations, at least the principal ones, should be numbered consecutively in the right-hand margin in curved parentheses. For nested equations use the following sequence of parentheses for grouping: $\{()$.

4. Illustrations

Charts and diagrams should be submitted in an original form suitable for direct reproduction. They should be supplied as clear black-and-white drawings with clear lettering all large enough to be reduced, if desired, in the same proportion. Photographs should be in focus, of high contrast, and submitted as glossy prints. Additional lettering and marking should be supplied on a separate cover sheet. Photograph should not be lettered with pencil or ink. Charts, diagrams and photographs are to be referred to as "figures" and should be numbered consecutively in the order in which they are referred to in the manuscript. Figure legends should be typed on a separate sheet. The amount of lettering on a chart or diagram should be reduced as far as possible by transferring it to the legend.

5. Tables

Tables should be typed on separate sheets. Tables should be numbered consecutively in the order in which they are referred to in the manuscript. In order to avoid the introduction of errors, tables may be reproduced directly from the authors typescript and as such will be treated in the same way as illustrations.

Sudan Engineering Society Journal

Editorial Board:

Chairman :	Abu baker Abdel Wahab Bsc, MSc, PhD, MSES
Editor :	Kamal Abdellatif Abdalla BSC, PhD, MSES, MIAG
Members :	Sami M. Sharif B.Sc., Ph.D., MSES, MIEEE
	Mohamed Ahmed Abdelbagi B.Sc, M.Sc., Ph.D.,
	Ahmed Mohamed ElSharif B.Sc., M.Sc. Ph.D., MSES
Computer Design By :	ELAbass Mohamed Ahmed
